### Abstract

A research conducted in the School of Architecture of the Federal University of Minas Gerais (UFMG), sought tools to assess the environment of your campus, in Pampulha. In this research a mobile app and a website were developed to enable users to make georeferenced reports about the quality of the space. In addition, there search also sought the formation of a focused awareness of environmental education of his members, and the opportunity to achieve advances in citizenship, co-responsibility and sense of belonging of these people.
