### Abstract

For new solutions in engineering education, as subjects or corporate social responsibility and sustainability courses do not have a mere decorative function in the curriculum, become necessary to define more clearly the methodology and content of the courses offered. Thus this study came from an academic need, and proved the need for further discussion of the topic in the different courses and areas. The objective of this study was to assess the knowledge of students Specialization course in Production PUCRS sore it. As a result it was noted the need for further study and the creation of a more detailed project to understand and possibly assist in the various academic curricula.
