INTERNATIONAL WORKSHOP
ADVANCES IN CLEANER PRODUCTION

“CLEANER PRODUCTION INITIATIVES AND CHALLENGES FOR A SUSTAINABLE WORLD”

CP: Sustainable Development and Environmental Higher Education

P. A. O. George

Independent researcher

Abstract

This work presents briefly the results obtained in the reduction and reuse of waste generated in various processes by applying CP principles. The aim of this work is not only to demonstrate the effectiveness of such principles in the management of industrial processes, but also to show the science required to perform such work, with the aim of highlighting the need to include CP principles in Environmental Higher Education, as the work of university graduates have a major impact on achieving or not sustainable development.

Keywords: *CP, Environmental Higher Education, sustainable development*
